DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kihara et al. (US Patent No. 5,889,504).

As to claim 1, Kihara discloses a display driving circuit (fig. 4), comprising: a plurality of driving stages, wherein the driving stages are electrically coupled in serial, (see Fig. 7) and each of the driving stages comprises a conducting path so as to transmit an electric signal from a previous driving stage to a next driving stage (e.g. right normal shift register); and a plurality of driving lines (the column line 1 to each pixel cell), wherein each of the driving lines corresponds to one of the driving stages respectively (see Fig. 7), and the driving line is electrically coupled to an output terminal of a corresponding driving stage (Fig. 7); wherein it is characterized in that a redundant device (e.g. right redundant shift register) is installed in each part of the driving stages, respectively, and the redundant device is capable of supplying an extra conducting path to transmit an electric signal from the previous driving stage to the next driving stage via the current driving stage while the original conducting path in the corresponding driving stage is broken.

As to claim 2, Kihara discloses the redundant device is added into a driving stage

subsequent to a plurality of preceding driving stages that are installed separately departing from a predetermined number of the driving stages with each other (see Fig. 4).

As to claim 3, Kihara discloses the redundant device is added to a plurality of contiguous driving stages subsequent to a plurality of preceding driving stages that are installed separately, departing from a predetermined number of the driving stages with each other (see Fig. 4).

Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US Patents 5,063,378, 5,781,171, 5,796,390, 5,859,627, 5,956,008 and 6,467,057 are cited to teach a redundant circuit for use in a liquid crystal display device.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to XIAO M. WU whose telephone number is 571-272-7761. The examiner can normally be reached on 6:30 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, PATRICK EDOUARD, can be reached on 571-272-7603. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
